

Skillful Craftsman to Launch Class Bot Powered by Technology from Developer of ChatGPT

February 16, 2023

A set of innovative AI-embedded application tools for different online education scenarios

WUXI, China, Feb. 16, 2023 (GLOBE NEWSWIRE) -- Skillful Craftsman Education Technology Ltd. ("the Company" or "Skillful Craftsman") (NASDAQ: EDTK), an education technology company providing interactive online learning services, today announced that it is developing Class Bot, a set of innovative AI-embedded application tools for different online education scenarios. Powered by the technology from OpenAI, the developer of ChatGPT, Class Bot is designed to help schools and training institutions quickly build online curricula, and improve the learning efficiency and graduation rate for students who are enrolling in online education classes through the adaptive learning model.

Currently, the Company is at the research and development stage for Class Bot and expects to complete the internal testing in the fourth quarter of 2023. With its auto curriculum function, Class Bot can collect and refine learning materials from different sources, highlight material learning points, and automatically generate course outlines and tests. The adaptive learning function of Class Bot will help personalize learning experience for students by managing their study syllabuses, organizing notes, and implementing customized study timetable. In addition, Class Bot will have an AI tutor function to help answer students' questions, track and supervise their learning progress, review test results, and give real-time feedback on students' learning achievements and areas to improve.

Mr. Bin Fu, Co-Chief Executive Officer and Director of the Company, commented, "As the embedded application tools for different types of online education scenarios, Class Bot will integrate technologies such as ChatGPT. We plan to promote Class Bot by applying the SaaS model to help small and medium-sized educational institutions quickly build their own online course system and improve the learning efficiency and satisfaction of their students. Class Bot can also help our enterprise customers across various industries to build their internal online vocational training platforms. Looking forward, we expect to officially launch Class Bot to the public in the fourth quarter of 2023 and will prioritize providing multilingual application versions for regions with booming vocational education markets, such as Southeast Asia."
